Subject:	DELIVERY SCHEDULE REPORT REQUEST

Mark - need a delivery schedule report created for Sonia - she currently inputs and emails a spreadsheet - but when doing this - she then has to input into our system also - which means that info is missed.

Need it to sort by Origin Port, Appt date

Need the following info on the Report

(these are headers across the page - but I'm listing them down the page - easier that way)

Job Id
Vendor
PO#
Delivering Case
Delivering Cube
Delivering Weight
Commodity
POC
Ph#

Sonia is there anything else that is needed on this report?

When the report is created - Sonia get w/ me - you'll input and use this report to email over to the terminals. This will make sure all data gets input that is needed - and you will use this as a tool to confirm

#1 - All orders delivered that was scheduled
#2 - That you received the b/l and cons info from the terminal

This will need to be done on a daily basis

Thanks!

Subject: PO NOT APPEARING

Dispatching -
FCL.rpt (83 KB)   Mark - here is one report where on this job id - the PO# is not appearing
(it's that way on all the reports) - is there a reason for this? I guess I have to go
through each page, container screen to ensure all information is there?

fyi - for some reason - some POs are not showing up on the sail charts, dispatches, load planning etc

before you send any of the reports out - you have to make sure the PO#s - or any other info - is not missing - if so - get w/ Mark and have him fix that field etc - then send the report out

thanks!

        I think what happened is when I made the job id's for the GMD's and tried to save it
but conflicted with Marks update. I then copied the job id's further down and saved all
other people's changes. It looks like the vendor name "GMD" was saved because the the
vendor name for the updated PO was blank. I updated the vendor name by checking the PO# in
the C&S system.

            I forget - and it would take me all day to scroll down and try to find.  I do
know the one job id I used - I marked it Teresa and then saved - but have since inputted
all the info and saved - have not used any other record

Subject:	263245 through 263297

This is a whole block of jobs that are blank and open. Can we get these cleaned up?
Originally showed Sonia was going to be using - but looks like she used later ones -
263299 and on

Someone may get confused and think that job id 263244 is the last record - when actually
there's a whole bunch more after it

Thanks!

Subject:	RECEIVING POS INTO LOGISTICS SYSTEM

Mark - just encountered a MAJOR problem!

Currently your program filters through "duplicate" purchase orders - and if a PO is in our system - the new PO from corporate will not import into our system.

Problem with that - with C&S POs - there will be duplications - right behind each other (probably on a monthly basis or sooner!)

Here's an example:

PO# 693058 - JOB ID 254799 POID 2328023 file received from corporate on 9-15-03 (order date was 9-12-03)

THIS PO WAS RECEIVED IN HOUSE ON 9-12-03

TODAY IS 9-30-03 - GENERAL MILLS PO 693058 was ordered on 9-21-03 AND IS DELIVERING TO LA MIRADA - BUT THIS PO IS NOT IN OUR SYSTEM!

Alot of orders showing up at the terminals - that we in logistics no nothing of. Greatly affecting the way the containers are being loaded - and the equipment that we planned to have available.

How can we fix this PLEASE!
